

**Jamaica Must Reject US Foreign Policy of Exporting Buggery and Sexual Confusion**

The US State Department has announced the visit to Jamaica of US Special Envoy for the Human Rights of Lesbian, Gay, Bisexual, Transgender (LGBT) Persons, Randy Berry, from May 21 – 23. Also visiting is USAID Senior LGBT Coordinator Todd Larson from May 20 – 23, 2015. <sup>1</sup>

At Mr. Berry's appointment, US Secretary of State John Kerry asserted that "defending and promoting the human rights of LGBT persons is at the core of our commitment to advancing human rights globally – the heart and conscience of our diplomacy. That's why we're working to overturn laws that criminalize consensual same-sex conduct in countries around the world." <sup>2</sup>

In other words, Messrs. Berry and Larson are here to get the Jamaican government and people to accept that all sexual activities are to be considered as normal and good. This is the US Foreign Policy: Exporting Buggery and Sexual Confusion.

What Jamaica needs to know:

- The visit of Messrs. Berry and Larson is contemptuous of our national sovereignty as expressed by the views of 91 percent of our people. The visit represents a new form of imperialism bullying vulnerable nations to accept a lifestyle, which is illogical and demonstrably harmful to our society and particularly to our children.
- New 'rights' have not resulted in the decrease of HIV/AIDs among Men who Sex with Men (MSM) in the USA (CDC, 2011).
  - HIV rates among MSM are reported to be 140 times the rate among heterosexual men. (Journal of AIDS, 2011)
  - HIV rates of up to 64.7% among some black MSM. (NYC Health,2011)
  - **Disturbingly, 98% of the difference in HIV rates between MSM and heterosexuals is due to the practice of anal receptive intercourse and role reversal** (i.e. the capability of MSM to be both the receptive and inserting partner). (Lancet 2012)
- The creation of special rights for sexual orientation has resulted in the loss of fundamental rights including freedom of speech, freedom of conscience and freedom of religion. Examples include former Atlanta Fire Chief- Kelvin

Cochran; bakers - Melissa & Aaron Klein; florist- Barronelle Stutzman; IT Specialist and former CEO Mozilla Firefox- Brendan Eich; photographer- Elaine Huguenin.

- Jamaica's children are already suffering from the effects of poor family life. We do not need to add the further harms of experimenting with same-sex parenting.
- The push to overturn laws against buggery is rooted in the 'research' of Alfred Kinsey. Kinsey's 'research' included reports from pedophiles who molested children as young as two (2) months old.
- Up to 1973, homosexuality was recognized as a sexual deviant disorder by the American Psychiatry Association (APA). In 1973, influenced by Kinsey's 'research' and harassed and bullied by gay 'rights' activists, the APA de-classified homosexuality as a disorder.
- The Human Rights Campaign (HRC), the largest LGBT organization in the USA was a major contributor to the Obama election in 2008 and re-election in 2012.
- Co-founder of HRC, 66 year old Terry Bean, is presently before the courts in the USA for alleged sexual contact with a 15 year old boy.

Jamaica must not Sell Out to a US Administration which has been Bought Out by LGBT Activists.
